+2348167187102 oylamifiyin@gmail.com linkedin.com/in/favour-oyelami-29b607a1 github.com/Fiyinfoluwa6

Core Competencies

- Credit Risk
- Machine Learning/NLP
- MLOps/DataOps
- Domain Expertise
- Data Engineering
- AI Engineering & GenAI
- Data Structures
- Business Intelligence

Professional Summary

Senior Data Scientist with over 6 years of experience delivering data-driven solutions across financial services, telecoms, and marketing technology. Proven expertise in credit risk modeling, customer behavior analytics, and end-to-end machine learning systems, from development to production and monitoring. Track record of driving measurable business impact, including increasing loan uptake by 12%. Demonstrates leadership in cross-functional initiatives, strong collaborator with product, risk, and engineering teams, known for translating complex data insights into practical solutions that improve customer experience and revenue outcomes.

Experience

Interswitch Group

April 2024 – Present

Senior Data Scientist

Lagos, State

- Led the development of a real-time credit portfolio intelligence platform in Flask/MongoDB with a Early Warning System (EWS) that flags loans due within 72 hours and escalates critical defaults at 30+ overdue days, integrated with In-house llm(Claude Opus) to generate grounded borrower risk assessments and lender recommendations from live portfolio data.
- Optimized existing company's credit scoring model, improving the ROC-AUC metric from 67% to 71%, this improved risk differentiation and reduced lending exposure to high-risk borrower.
- Led the development of a rule-based scorecard using customer loan and transaction features, helping to categorize users by credit and transaction behavior, enabling Product and Risk teams to make more informed decisions, and contributing to a 12% increase in loan uptake.
- Led the development of a loan portfolio analysis dashboard that enabled successful loan reconciliation for top lenders like Migo, XtraCash, aligning loan records across systems and contributing to a measurable decrease in unresolved loans.
- Integrated opay, moniepoint and palmpay customer accounts into existing customer transaction database, resulting in a 15% average increase in total customer account volume.
- Deployed Evidently AI on company large-scale cluster to monitor data drift and model performance drift, improving model reliability.
- Developed and maintained a loan retention and churn analytics dashboard using historical data to track at-risk borrowers, directly informing strategies to improve retention

Bluechip Technologies, Ltd

Apr 2022 – Mar 2024

Senior Data Scientist- Consultant

Lagos, State

- Led and managed the building and implementation of a Transaction Classifier (NLP) model using machine learning to categorize customer transactions accurately with a classification success rate of 98%.
- Conducted in-depth analysis of subscribers browsing transactions history, to deliver valuable insights to MTN Nigeira stakeholders.
- Developed a chatbot for Wema Wiki utilizing RAG techniques, achieving an accuracy rate of 93% and latency of 88%.
- Developed and deployed advanced machine learning model for CBN eNaira, including a Customer Lifetime Value (CLV) predictor, Forecasting capital transfers and loan repayments to improve financial planning and decision-making.
- Led MLOps workflows with Airflow and Docker, optimizing model deployment and maintaining low-latency endpoint APIs for real-time predictions

Terragon Group, Ltd

Jul 2021 – Mar 2022

Data Scientist

Lagos, State

- Analysed extensive supply-side telecom data comprising over 80 million subscribers, providing key insight into demographic, technographic, and socio-economic trends, which were presented to relevant stakeholders.
- Engineered a customised Named Entity Recognition model employing Spacy that successfully extracted entities from transactional text, resulting in significant process automation.
- Conducted A/B experiments, optimising campaign strategies to maximise reach effectiveness.
- Created insightful Dashboards using AWS QuickSight, leveraging output tables to monitor daily consistency metrics.

Renmoney MFB

Jan 2020 – Jun 2021

Data Scientist

Lagos, State

- Built credit risk scorecards with ML, deploying them via RESTful APIs to streamline loan underwriting processes for real-time decisions.
- Developed and maintain a customer propensity model to improve collections processes with Machine Learning.
- Contributed to the drafting of policy documents and codes for underwriting process automation.

Technical Skills

Programming & Databases: Python, SQL, PySpark, RDS, SQL Server, Athena

Cloud & Storage: AWS (S3, Glue, EMR, SageMaker, EC2), Azure (ML Studio, Functions, DevOps, App Service), Apache Hadoop (HDFS, Hive)

ML/AI Tools: Scikit-learn, MLlib, NLTK, Spacy, OpenAI API's, Aws Bedrock, MLflow, Evidently AI, Pinecone

Visualization & BI: Power BI, QuickSight, Looker Studio

MLOps & Model Deployment: Docker, MongoDB, Airflow, Jenkins, GitHub, Bitbucket, FastAPI, Flask, Streamlit

Education

University of Ibadan

Mar. 2018 – Jan 2021

Master of Science in Computer Science

Oyo State, Nigeria

Bowen University

Aug. 2011 – June 2015

Bachelor of Science in Computer Science

Osun State, Nigeria

Training and Certifications

Udacity

Data Science Nanodegree

2020

Community and Recognition

Amazon Web Services

Community Builder

2022 - Present
